Driver seats manufacturer for specialized vehicles

CREST-AIR

100% PNEUMATIC

Comfort-Durability-Performance

CREST-AIR: 100% pneumatic

The CREST-AIR series' unique features include a seat consisting entirely of air chambers in the backrest and seat pan. Enjoy total pneumatic protection from impacts and vibrations caused by varying road surfaces.

DURABILITY

Modular design protects moving parts and simplifies preventive maintenance.

PERFORMANCE

Unique pneumatic protection reduces exposure to vibrations and allows for extended periods of operation.

ERGONOMICS

Innovative lumbar support promotes a neutral position.

COMFORT

Functions and adjustment ranges for customized driver support.

Tailored to Each Driver

CREST-AIR features a range of mechanical and pneumatic adjustments to suit each driver's morphology.

The seat pan can be extended independently of the seat back over a 7.5-cm range. Pneumatic supports are optimally positioned to suit individual requirements. The seat pan's adjustable depth provides knee space and promotes blood flow, which relieves pressure on the lower back.

Sophisticated Pneumatic Options

The air chambers in the seat pan inflate for even pressure point distribution. A variety of inflation levels make it possible to modify the driving position in order to prevent muscle fatigue.

Lumbar supports, a concept exclusive to AMOBI, hug the vertebrae and directly support the lumbar muscles. This support promotes a safe, neutral position.

Pneumatic options available:

SEAT PAN

- 4 adjustable chambers

SEAT BACK

- 2 double lumbar supports
- 1 left-right lateral support

SEAT PAN

- 2 adjustable chambers
- 2 sealed chambers

SEAT BACK

- double lumbar supports

Working in a seated position under uncontrolled conditions, combined with prolonged exposure to vibrations, eventually leads to occupational disease. CREST-AIR's ergonomic options are an effective solution that may reduce the impact of problems that affect those who work in the skilled trades.

AMOBI, manufacturer of operator seats for specialized vehicles, offers a range of products that combine comfort, durability and performance. The most intense working conditions are the inspiration for our know-how.

Our industrial seats ensure the operator's comfort and meet the requirements of operations managers and maintenance. Our technical solutions are designed to protect moving parts. They offer modular design and vibration reduction thanks to moulded high density foam. Our innovative use of pneumatic systems are what set apart the AMOBI 100% pneumatic seat.
